Contract Framework

In a 2022 survey on supports needed in research contracts, 76% stated that they needed in house resources with legal expertise, 54% templates and guides would be their second choice.

Included in the framework is 10 of the most common Research Agreements standard HSE Research approved Contract Templates and Guides

Next Steps

Compliance / Legal and regulatory matters for Clinical Trials

1. Working on general guidance and processes for contracts
2. Working with Stakeholders on a National Sponsor, CRO and Clinical Organisation CTA Template
3. Working with Stakeholders on a Academic, Sponsor and Clinical Organisation CTA Template

Why is there a need to have a national approach

Essential to create an environment where research can be sustained and flourish.
Data Protection and Legal is there for enhancement of patients rights but not a barrier to research

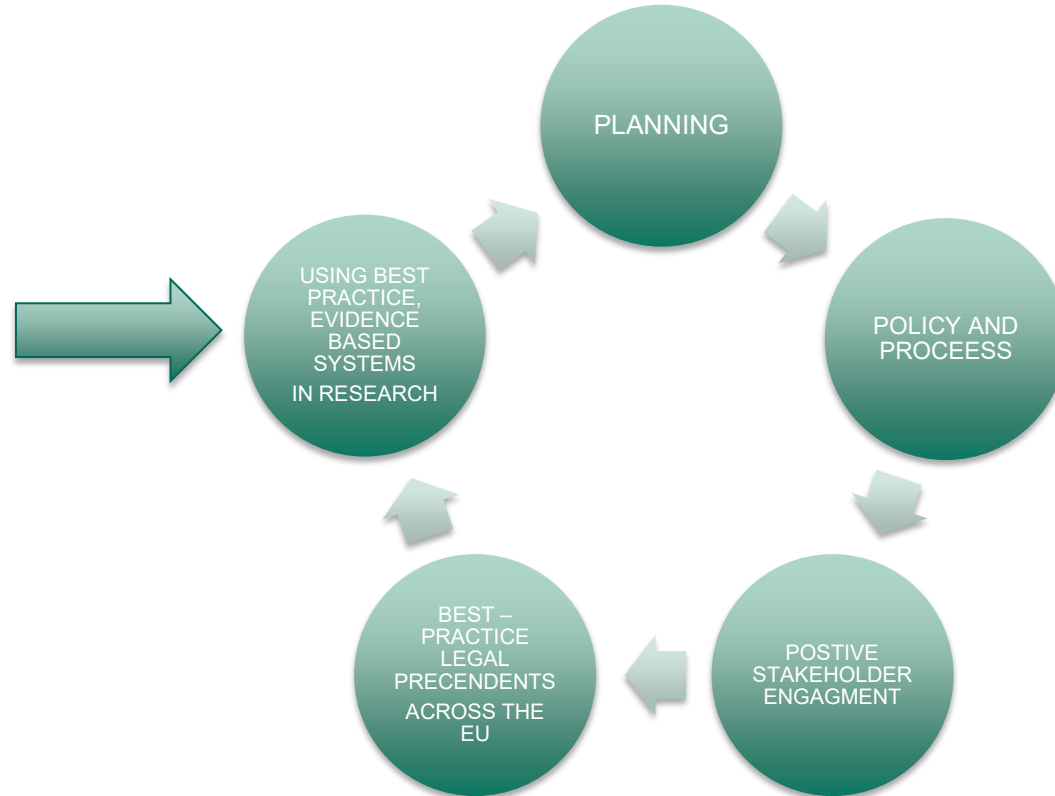

Key Challenges in the Healthcare Services

- Risk management and minimisation
- Broader Awareness about research activity will lead to knowledge translation.
- Attract staff – facilitate recruitment
- Opportunities for patients to participate in research
- Access to new ideas, new technologies, new treatments, new opportunities to improve.
